NARRATIVE REPORT

☒ INTERIM

☐ FINAL

Two recent monitoring trips have been made on this contract, the first on 9 March 1966 to White Sands Missile Range, New Mexico, and the second on 8 April to the [redacted]. On both occasions, the inspector conferred with [redacted].

25X1
25X1

Significant breakthroughs in the design of small aspherics have been few and far between of late. Even the computer design of spherical elements has encountered many obstacles. Encouragement, however, has been generated by the Army's recent establishment of a real-time data link from their large White Sands 7094-Model II computer facility to the [redacted]. Primary motivation for the funding of this venture was the consequent facilitating of [redacted] design of large optical elements, but our contract should also reap this benefit in the form of decreased design time and increased efficiency.

25X1

[redacted] revealed that [redacted] has been doing significant work in the area of aspheric lens fabrication for the Air Force and suggested a joint visit to the facility in the near future. In addition, he reported plans for a week-long "brainstorming" session at White Sands in August at which he will be accompanied by various associated graduate students.
